Development Intern

PROFILE: Recently graduated high school student with substantial interest in the world of software development. Ability to take an idea and turn it into something useful. Very detailed oriented in making an intuitive user experience.

HIGHLIGHTS:

- Finding solutions to problems
- Good with time management
- Always staying organized
- Always looking to expand my knowledge
- Love to talk to people
- Giving up isn't an option

TECHNICAL EXPERTISE:
Languages: Java, JavaScript, CSS, C#, Swift, HTML
Frameworks: AngularJS, jQuery, Multi-peer Connectivity
Software: Eclipse, Xcode, Sublime Text, MS Word

EDUCATION:
Timpanogos High School, Orem, Utah
Class of 2016

Coursework:
Technology Track: This course isn't an in school course. I am currently taking this course 4 days a week 8-12. I was given a $10,000 scholarship to be able to participate in this course.
AP Computer Science: This was a full year course and it was all Java and learning concepts such as OOP, sorting, inheritance, polymorphism, data, and control flow
AP BC Calculus: Highest level math class available at the school. Full year class with coursework everyday.
Computer Programming: Half year intro level programming class. All work was done in C#.
Digital Media: Full year class working in adobe creative cloud. I really enjoyed photoshop and premiere pro.
3D Animation: Full year class doing digital animation. We did all the course work in Cinema 4D.
TV Production: Half year class expanding my skills in cinematography. Premiere Pro was the program used for this course.
